Lessard-Sams Outdoor Heritage Council
Laws of Minnesota 2013 Accomplishment Plan

Date: October 02, 2017

Program or Project Title: Wild Rice Shoreland Protection

Funds Recommended: $ 1,630,000

Manager's Name: Dan Steward
Title: Board Conservationist
Organization: Minnesota Board of Water and Soil Resources
Address: 1601 Minnesota Drive
City: Brainerd, MN 56401
Office Number: 218-828-2598
Email: dan.steward@state.mn.us
Website: bwsr.state.mn.us

Legislative Citation: ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 4(d)

Appropriation Language: $1,630,000 in the first year is to the Board of Water and Soil Resources to acquire in fee wild rice lake shoreland habitat for native wild rice bed protection and to acquire permanent conservation easements in cooperation with Ducks Unlimited. Of this amount, $100,000 is for an agreement with Ducks Unlimited for acquisition of land or interests in land to protect native wild rice beds. Up to $48,000 is for establishing a monitoring and enforcement fund, as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. A list of proposed land acquisitions must be included as part of the required accomplishment plan.

County Locations: Aitkin, Carlton, Cass, Crow Wing, Hubbard, and Itasca.

Regions in which work will take place:

- Northern Forest

Activity types:

- Protect in Easement
- Protect in Fee

Priority resources addressed by activity:

- Forest
- Habitat
- Wetlands

Abstract:

This phase II continuation of a 2012 L-SOHC project will protect 1,015 acres translating to 8 miles of wild rice shoreland habitat through permanent conservation easements and fee-title acquisition, the Council's top Priority Action identified for the Northern Forest Section.

Design and scope of work:

Wild rice is the "State Grain" of Minnesota. Minnesota remains the epicenter of this plants natural range supporting more habitat than any other state in the U.S. This phase II project will continue critical habitat protection that will help to keep this legacy intact.

Wild rice shoreland encompasses a complex of shallow lakes, rivers, and shallow bays of deeper lakes that support rice and provide some of the most important habitat for wetland-dependent wildlife species in Minnesota. Wild rice habitat is especially important to Minnesota's migrating and breeding waterfowl and provides Minnesotans with unique recreation opportunities: hunting waterfowl and

harvesting the rice itself for food. Wild rice is also spiritually important to Native Americans and is a part of Minnesota's rich natural and cultural heritage.

Historically, wild rice occurred throughout Minnesota and extended into northern Iowa. Wild rice has since been extirpated from most of its southern range due to human impacts including changes to water quality and chemistry, sedimentation, landscape drainage, flow alteration, boat traffic and competition from introduced aquatic invasive species. Today, the heart of the states wild rice acreage falls within this project work area comprised of eight counties Aitkin, Carlton, Cass, Crow Wing, Hubbard, Itasca, St. Louis, and Wadena. These counties also account for 70% of harvesting trips for state licensed harvesters.

This wild rice shoreland complex exists primarily in the state's Forest Section and remains intact with good water quality, but it is subject to intense development pressure that, if allowed, will degrade the resource. Recent well-documented population and development trends pose a serious threat to wild rice habitat in the Northern Forest Section. This population and development boom has reduced the availability of developable shoreline on recreational lakes, resulting in shallow lakes, rivers, and shallow bays containing wild rice being increasingly targeted for shoreline development.

Shallow lakes and rivers in the forest are very susceptible to the impacts of shoreline development. The alteration of shoreline vegetation, construction of impervious surfaces, placement of in-lake structures, and increased boat and water based recreation can result in a reduction in emergent and floating plant abundance; mixing of bottom sediments, increased nutrient loading (including substantial changes in phosphorous) and shoreline erosion. Further, expectations of new shoreline homeowners may conflict with wildlife management strategies designed to maximize wild rice production and improve waterfowl habitat. The impact of development is cumulative, and over time, such changes can severely reduce wild rice production, water quality and waterfowl use of these important water bodies.

Beyond public ownership, current shoreline protection on wild rice shoreland is limited to county shoreland ordinances and zoning, and limited conservation efforts by non-governmental organizations. Variances to land use rules aimed at preserving the state's most valuable resource, our lakes and rivers, are at times allowed. Further, even the most stringent shoreland ordinances still allow for some subdivision and development, which is detrimental to the wild rice shoreland complex.

Voluntary, incentive-based protection programs and voluntary conservation options for shoreland landowners are few. Unlike the prairie portion of the state where agency-backed easement options exist for conservation-minded landowners, private land protection options are limited for wild rice shoreland in the forest due to funding constraints and the fact that many easement programs are targeted for restoration and not protection. In the northern forest, there is much less need for restoration, thus this phase II proposal is again focused on habitat protection. This proposal is designed to continue to fill a need for shoreland protection on key water bodies supporting wild rice in the Northern Forest Section.

Phase I of this project began with 2012 Lessard-Sams Outdoor Heritage Council (L-SOHC) funding by providing wild rice lake shoreline landowners with expanded protection options through permanent shoreland conservation easements and, where needed, fee-title acquisition. This extremely successful effort is poised to exceed project goals with over eight miles of important shoreland habitat proposed for permanent protection from development. This planning work was accomplished in six months. The supply of offered quality easements exceeded available funds.

To accomplish phase II, Ducks Unlimited (DU), Minnesota Board of Water & Soil Resources (BWSR), Minnesota Department of Natural Resources – Section of Wildlife (DNR Wildlife), Laurentian Resource Conservation and Development Council (LRCD), and the eight work area Soil and Water Conservation Districts (SWCDs) propose to expand voluntary easement programs to offer permanent shoreland conservation easements on shallow lakes, rivers and shallow bays producing wild rice through both the BWSR's Reinvest In Minnesota (RIM) program (1,000 acres). Ducks Unlimited will also secure fee-title acquisitions (15 acres) from willing sellers with transfer to MNDNR, county, or other agency (with county approval).

Emphasis of this phase II will again be placed on securing permanent conservation easements over fee-title acquisition, which will keep land in private ownership and on local and county tax rolls. Fee-title acquisition will be offered in cases where land is for sale and conservation easements are not an option to protect shoreland or where a tract is a private land in-holding or is adjacent to extensive public land and a desirable addition to public land holdings. Fee-title acquisitions will have public access.

Through the eight work area SWCD offices, with help from DU biologists and other partners, BWSR will offer to purchase RIM shoreland easements from wild rice lake and river shoreline landowners using RIM rates set by BWSR. Tracts to be offered conservation easements will be selected based on the degree they help permanently protect all the land around a given wild rice water body. The BWSR/SWCD easements will be acquired through a signup process similar to the BWSR/WRP program. SWCD generated landowner signups received by the project committee will be reviewed and parcels ranked with guidance provided by the "Wild Rice Shoreland Protection Criteria Sheet". The criteria sheet is included under the attachments tab.

Shoreland protection for wild rice lakes and rivers enjoys widespread support from tribal interests, SWCDs, LRCD, Minnesota Forestry Association, outdoor clubs, and other wild rice stakeholders in north-central Minnesota. Independent letters of support will be

submitted separately to the Council.

Which sections of the Minnesota Statewide Conservation and Preservation Plan are applicable to this program:

- H2 Protect critical shoreland of streams and lakes
- H3 Improve connectivity and access to recreation
- H4 Restore and protect shallow lakes
- H5 Restore land, wetlands and wetland-associated watersheds
- H6 Protect and restore critical in-water habitat of lakes and streams
- H7 Keep water on the landscape
- LU8 Protect large blocks of forest land
- LU10 Support and expand sustainable practices on working forested lands

Which other plans are addressed in this program:

- Long Range Duck Recovery Plan
- Managing Minnesota's Shallow Lakes for Waterfowl and Wildlife
- Minnesota DNR Strategic Conservation Agenda
- Minnesota Forest Resource Council Landscape Plans
- Natural Wild Rice in Minnesota

Which LSOHC state-wide priorities are addressed in this program:

- Address conservation opportunities that will be lost if not immediately acted on
- Allow public access. This comes into play when all other things about the request are approximately equal
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Target unique Minnesota landscapes that have historical value to fish and wildlife

Which LSOHC section priorities are addressed in this program:

Northern Forest:

- Protect shoreland and restore or enhance critical habitat on wild rice lakes, shallow lakes, cold water lakes, streams and rivers, and spawning areas
- Protect forestland though acquisition or easement to prevent parcelization and fragmentation and to provide the ability to access and manage landlocked public properties

Relationship to other funds:

- Not Listed

Describe the relationship of the funds:

Wild rice has significant cultural importance to Minnesota's Native Americans.

How does this program accelerate or supplement your current efforts in this area:

Phase II funding would continue work to protect wild rice lake and river shoreland begun by the phase I effort. When work started on phase I, it was unknown how much interest there would be on the part of landowners on wild rice lakes to permanently protect these important habitats. Over the past year field staff with DU, DNR, BWSR and the SWCD's have all found strong interest on the part of landowners.

Permanently protecting wild rice lake shoreland also compliments ongoing efforts by DU and DNR Wildlife to manage water levels on wild rice lakes. Wild rice plants are very susceptible to rising water levels when they are in the floating leaf stage in June. Beaver dams that restrict the outlets of wild rice lakes and raise water levels can ruin the entire rice crop for the year. DU and DNR Wildlife have for many years coordinated efforts to remove beaver and dams in order to save the rice crop and its benefits for wildlife. Permanent protection of wild rice shoreland adds a protection element to the ongoing maintenance effort that together make a comprehensive program for wild rice lakes recommended by the Wild Rice Working Group

Per MS 97A.056, Subd. 24, Any state agency or organization requesting a direct appropriation from the OHF must inform the LSOHC at the time of the request for funding is made, whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose:

Not Listed

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Land acquired in fee-title by Ducks Unlimited will be transferred to the MNDNR.

RIM easements will be secured and permanently monitored and enforced by the BWSR and county SWCDs professional field staff, and will become the responsibility of the state. Tracts to be protected through this grant are generally forested, and protection clauses will be focused largely on maintaining existing forest stands and preventing shoreline alterations (especially subdivision and development), and will therefore be relatively straightforward to monitor and manage.

Activity Details:

Will there be planting of corn or any crop on OHF land purchased or restored in this program - **Not Listed**

Will local government approval be sought prior to acquisition - **No**

This project will primarily purchase easements and coordination is not required. Any parcels aquired in fee will ultimately be part of the WMA system and DNR will seek local government approval as part of its normal process. This box was checked wrong on the original submittal and changes to the Accomplishment Plan were not allowed due to time constraints at the end of last years legislative session.

Is the land you plan to acquire (fee title) free of any other permanent protection - **Yes**

Is this land open for hunting and fishing - **Yes**

The shoreland easements will not be open to hunting or fishing. The adjacent water bodies that will be protected from development will usually have public access points and therefore, be open for hunting and fishing. Land acquired through fee-title will be open to hunting and fishing.

Will the eased land be open for public use - **No**

Is the land you plan to acquire (easement) free of any other permanent protection - **Yes**

Accomplishment Timeline:

Activity	Approximate Date Completed
RIM Shoreland Easements secured on 1,000 acres	June 30, 2016
DU Fee-Title Aquisition purchaced 15 acres in fee-title	June 30, 2016

Date of Final Report Submission: 11/1/2017

Federal Funding:

Do you anticipate federal funds as a match for this program - **Not Listed**

Outcomes:

Programs in the northern forest region:

- Forestlands are protected from development and fragmentation
- Healthy populations of endangered, threatened, and special concern species as well as more common species
- Improved aquatic habitat indicators
- Increased availability and improved condition of riparian forests and other habitat corridors

Budget Spreadsheet

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan

How will this program accommodate the reduced appropriation recoomendation from the original proposed requested amount
