### Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2013 <u>Final Report</u>

Date: November 05, 2019

Program or Project Title: DNR Wildlife Management Area, Scientific and Natural Area and Native Prairie Bank Easement Acqui

Funds Recommended: \$4,940,000

Manager's Name: Patrick Rivers Organization: MN Dept. of Natural Resources Address: 500 Lafayette Road City: St. Paul, MN 55155 Office Number: 651-259-5209 Fax Number: 651-297-4916 Email: pat.rivers@state.mn.us Website: www.mndnr.gov

#### Legislative Citation: ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 2(c)

**Appropriation Language:** \$4,940,000 in the first year is to the commissioner of natural resources to acquire land in fee for wildlife management purposes under Minnesota Statutes, section 86A.05, subdivision 8; acquire land in fee for scientific and natural area purposes under Minnesota Statutes, section 86A.05, subdivision 5; and acquire native prairie bank easements under Minnesota Statutes, section 86A.05, subdivision 5; and acquire native prairie bank easements under Minnesota Statutes, section 84.96. Up to \$42,000 is for establishing a monitoring and enforcement fund, as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17, for native prairie bank easements. A list of proposed land and permanent conservation easement acquisitions must be provided as part of the required accomplishment plan.

**County Locations:** Becker, Brown, Clearwater, Hubbard, Jackson, Kandiyohi, Pennington, Stearns, Stevens, Swift, Wadena, Wilkin, and Wright.

#### Eco regions in which work was completed:

- Northern Forest
- Forest / Prairie Transition
- Southeast Forest
- Prairie
- Metro / Urban

#### Activity types:

- Protect in Easement
- Protect in Fee

#### Priority resources addressed by activity:

- Wetlands
- Forest
- Prairie
- Habitat

#### Summary of Accomplishments:

Work resulting from this appropriation resulted in the acquisition, development, and inclusion of 2,095 acres into the state Wildlife Management Area (WMA) system, 74 acres into the the state Scientific and Natural Area system, and through easement acquisition added 387 acres to the state Native Prairie Bank.

#### **Process & Methods:**

Through this appropriation the MN DNR protected lands in the prairie, forest prairie transition, northern forest, and metro urbanizing ecological sections. The MN DNR prioritized our acquisitions to focus on parcels with an existing habitat base, acquisition opportunities that provided connectivity and worked toward building habitat complexes, and opportunities that allowed us to maximize habitat benefits. All acquisitions were a result of a relationship with a willing seller. We scored them using a GIS based tool that assigns points based on the natural resource attributes along with other ecological and management criteria. We then ranked them in importance based on their score and input from local DNR land managers. All acquisitions where then subject to County Board review and approval. Ten WMA parcels and one SNA totaling 2,169 are now permanently protected as a result of acquisitions funded by this program. This eclipsed our Accomplishment Plan goal for acquisition by 561 acres. In addition we protected 387 acres through easement in Native Prairie Bank.

#### Explain Partners, Supporters, & Opposition:

Collaborative partnerships are an integral part of our work in strategic land acquisition. Partners that we consult and work with include local townships, watershed districts, and counties. In addition we work closely with acquisition partners such as Pheasants Forever, Ducks Unlimited and the Nature Conservancy to ensure that we are coordinating our acquisition efforts in a way that maximizes conservation outcomes. We work very closely with counties as we seek resolutions of approval from the County Board of Commissioners for all MN DNR led acquisitions.

#### **Additional Comments:**

#### Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

The one ongoing challenge we have in acquiring land is the difference between appraised value and a landowners expectations as to what their land is worth. Because of this, we do have a certain percentage of landowners that reject our offer.

#### **Other Funds Received:**

• Reinvest in Minnesota (RIM) Small Game Surcharge

#### How were the funds used to advanced the program:

We used RIM and Small Game Surcharge funding to supplement landowner payments (FeeAcq w/PILT) and professional services expenditures for select WMA acquisitions made with this appropriation.

# What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

All acquisitions funded through this proposal are state lands, and are part of the state outdoor recreation system. Ongoing management will be accomplished through routine work duties by our network of DNR Area staff. Periodic enhancements will be accomplished by DNR staff, MCC crews, temporary project staffing or through vendor contract using traditional habitat funding, bonding, and future requests for funding from dedicated funding sources. Native Prairie Bank staff in partnership with the landowner will actively seek funding to execute the best on-going prairie management activities. These management activities, such as prescribed burning, invasive species control, woody control, etc., will be completed when feasible through a variety of funding sources.

#### **Outcomes:**

#### The original accomplishment plan stated the program would

#### Programs in the northern forest region:

- Forestlands are protected from development and fragmentation
- Increased availability and improved condition of riparian forests and other habitat corridors

#### How will the outcomes be measured and evaluated?

The outcome related to protection from development and fragmentation will be evaluated through periodic analyses conducted by DNR Area staff and conservation organizations seeking to measure and describe the extent of fragmentation in this part of the state. The Bodura Jack Pine Forest SNA tract purchased with this appropriation is an example of such an outcome and it will be protected from fragmentation and provide additional wildlife related and outdoor recreation opportunities.

#### Programs in forest-prairie transition region:

• Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need

- Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands
- Water is kept on the land

#### How will the outcomes be measured and evaluated?

The outcome related to protection from development and fragmentation will be evaluated through periodic analyses conducted by DNR Area staff and conservation organizations seeking to measure and describe the benefit of acquiring land and restoring wetlands and uplands that will not only benefit grassland/wetland dependent bird species but better control run off from snow melt and rain events. MN DNR Area land managers, non-game program, and Biological Survey will continue to work on monitoring protocols to monitor acquisitions and take any necessary actions to sustain the habitat base for waterfowl, upland birds, and species of greatest conservation need.

#### Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need
- Protected habitats will hold wetlands and shallow lakes open to public recreation and hunting

#### How will the outcomes be measured and evaluated?

The outcomes of a network of connected habitat corridors will be evaluated through periodic analyses conducted by DNR and conservation organizations. One example is the analyses conducted by the multi-partner Metro Conservation Corridors effort. The Pelican Lake parcel acquired with this appropriation further protects and provides public recreation opportunities on one of the most important shallow lakes in the state. It's proximity to the greater twin cities metropolitan area make it a close to home destination for waterfowl hunters and wildlife watchers.

#### Programs in southeast forest region:

- High priority riparian lands, forestlands, and savannas are protected from parcelization and fragmentation
- Remnant goat prairies are perpetually protected

#### How will the outcomes be measured and evaluated?

There were no acquisition in the southeast forest region.

#### Programs in prairie region:

- Expiring CRP lands are permanently protected
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Protected, restored, and enhanced shallow lakes and wetlands

#### How will the outcomes be measured and evaluated?

Outcomes related to parcels acquired in the prairie region with this appropriation are quantitative. They include acres of expiring CRP acquired. Acres of wetlands and feet of shallow lake shoreline protected. Acres of wetlands and grasslands restored and enhanced creating habitat for upland birds and waterfowl.

### **Budget Spreadsheet**

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

#### Total Amount: \$4,940,000

#### Budget and Cash Leverage

#### Target Lake/Stream/River Feet or Miles (original)

0.5

#### Target Lake/Stream/River Feet or Miles (final)

2.86 miles of lake shoreline/stream protected

#### Explain the success/shortage of acre goals:

Our ability to find willing sellers of high priority parcels at a cost per acre lower than our initial expectations allowed us to exceed our overall Accomplishment Plan acre goal for protect in fee acquisition w/PILT by 561 acres. We fell 73 acres short of our protect in easement Accomplishment Plan acre goal not for lack of demand, but due to expending our budget.

### **Parcel List**

### Section 1 - Restore / Enhance Parcel List

No parcels with an activity type restore or enhance.

#### Section 2 - Protect Parcel List

Becker

Name	TRDS	Acres	OHF Cost	Existing Protection?	Hunting?	Fishing?	Description
Ogema Springs WMA	14242225	80	\$148,000	No	Full	Yes	This private property consists primarily of a large wetland and borders the west side of Ogema Springs WMA (north unit). Approximately 11 acres of native prairie exists on the property, which includes rare native plants. The South Branch of the Wild Rice River, which flows through the property, may have formerly supported a brook trout fishery. The east side of the WMA is adjacent to a 239-acre Waterfowl Production Area. Seventeen upland acres that are currently being farmed on the property could be restored to native grasses and forbs and thereby used as dense nesting cover for waterfowl and grassland nesting passerines.
Brown				<u>.</u>			
Name	TRDS	Acres	OHFCost	Existing Protection?	Hunting?	Fishing?	Description
Vogel WMA 2	10835203	85	\$201,382	No	Full	Full	Existing CRP field immediately adjacent to the existing Voigel WMA with one type 3 wetland basin. The remainder is brome or low diversityprairie grass.
Clearwater
