

Lessard-Sams Outdoor Heritage Council

Laws of Minnesota 2013 Accomplishment Plan

Date: April 25, 2018

Program or Project Title: RIM Wetlands Partnership Phase V

Funds Recommended: \$ 13,390,000

Manager's Name: Tim Koehler

Title: Senior Programs Advisor

Organization: Board of Water and Soil Resources

Address: 520 Lafayette Road North

City: St. Paul, MN 55155

Office Number: 651-296-6745

Email: tim.koehler@state.mn.us

Website: www.bwsr.state.mn.us

Legislative Citation: ML 2013, Ch. 137, Art. 1, Sec. 2, Subd. 4(a)

Appropriation Language: \$13,390,000 in the first year is to the Board of Soil and Water Resources to acquire permanent conservation easements and restore wetlands and associated upland habitat in cooperation with the United States Department of Agriculture Wetlands Reserve Program and Ducks Unlimited, including \$1,000,000 for an agreement with Ducks Unlimited to provide technical and bioengineering assistance. Up to \$120,000 is for establishing a monitoring and enforcement fund, as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. A list of permanent conservation easements must be provided as part of the final report.

County Locations: Becker, Blue Earth, Clay, Freeborn, Le Sueur, Lincoln, Lyon, Meeker, Murray, Nobles, Redwood, Steele, Stevens, Todd, West Ottertail, and Wilkin.

Regions in which work will take place:

- Forest / Prairie Transition
- Metro / Urban
- Prairie

Activity types:

- Protect in Easement
- Restore

Priority resources addressed by activity:

- Habitat
- Prairie
- Wetlands

Abstract:

The Reinvest in Minnesota (RIM) Wetlands Partnership Phase V will protect and restore approximately 2,500 acres of previously drained wetlands and adjacent native grasslands on 25 conservation easements. It will utilize stand-alone RIM wetlands easements.

Design and scope of work:

The RIM Wetland Partnership Phase V will accelerate the restoration and protection of approximately 2,500 acres of previously drained wetlands and associated upland native grassland wildlife habitat complexes via permanent conservation easements. The goal of the RIM Wetlands Partnership is to achieve the greatest wetland functions and values, while optimizing wildlife habitat on every acre enrolled in the partnership.

We expect to enroll approximately 25 permanent conservation easements totaling 2,500 acres of wetland grassland wildlife habitat complexes. This will enable the RIM Wetlands Partnership to restore approximately 100 previously drained wetland basins totaling 825 wetland acres, and adjacent native grassland prairies on approximately 1675 acres. These restored wetlands and native grassland complexes will provide critical habitat for migratory waterfowl and other wetland dependent wildlife species in Minnesota. Wetlands and adjacent grasslands provide habitat for waterfowl, pheasants, deer and non-game species, some that are threatened or endangered.

Minnesota's original wetland and prairie landscapes have been lost at an alarming rate over the last century and a half of European settlement. Minnesota's prairies once comprised nearly 20 million acres, extending from the borders of Iowa and Wisconsin in the southeast to North Dakota and Manitoba in the northwest. Less than 1% of this native prairie remains. Minnesota has lost an estimated 42 percent of its original 16 million acres of wetlands to drainage or fill activities. The loss of wetlands is most severe in the prairie regions of the state. Approximately 90% of prairie wetlands have disappeared and in the southwestern part of the state losses are as high as 99%.

Prairie wetlands are particularly important for migratory waterfowl. Although the North American pothole region contains only about 10% of the waterfowl nesting habitat on the continent (including a significant portion of Minnesota), it produces 70% of all North American waterfowl. This extensive loss of Minnesota's prairie and wetland habitat has led to the decline of many wildlife and plant species originally abundant in the state. Of the nearly 1,200 known wildlife species in Minnesota, 292 species, or approximately one-fourth, are at risk because they are rare; their populations are declining or they face serious risks of decline due to loss of habitat.

The RIM Wetlands Partnership Phase V, is a local-state-federal partnership delivered locally by the Soil and Water Conservation Districts (SWCDs) and the Board of Water and Soil Resources (BWSR). In addition, this partnership is possible through collaboration among many local, state and federal partners including Ducks Unlimited (DU), the Minnesota Waterfowl Association (MWA), Pheasants Forever (PF), the Minnesota Department of Natural Resources (MNDNR) and the United States Department of Interior - Fish and Wildlife Services (USFWS).

In addition, we are formally continuing to include Ducks Unlimited in the RIM Wetlands Partnership Phase V. DU will provide engineering services, promote RIM easements and provide key essential technical assistance and project management services through approximately 10 DU contract RIM specialists.

The RIM Reserve & Soil Conservation Committee – a subcommittee of the Minnesota Board of Water and Soil Resources – provides oversight and guidance on behalf of the BWSR.

The RIM Wetlands Partnership will hold one to two meetings per year to provide program oversight and guidance and to establish payment rates for upcoming sign-ups. Specifically, the RIM Wetlands Partnership will use the USFWS Habitat and Population Evaluation Team (HAPET), located in Fergus Falls, developed GIS Wildlife Habitat Potential Model for use with the RIM Wetlands Partnership's environmental evaluation. In addition, the RIM Wetlands Partnership has developed the RIM Wetland Restoration Evaluation Worksheet which is used to evaluate each easement application on its potential to restore wetland functions and values along with optimum wildlife habitat benefits.

We will conduct a RIM Wetlands Partnership statewide sign-up in early 2015. All applications will be scored and ranked using the RIM Wetland Restoration Evaluation Worksheet. The worksheet determines which projects will provide the greatest wetland functions and values and optimizes wildlife habitat on the selected and enrolled acres. The highest scoring applications will be selected for funding with Outdoor Heritage Funds.

Which sections of the Minnesota Statewide Conservation and Preservation Plan are applicable to this program:

- H1 Protect priority land habitats
- H4 Restore and protect shallow lakes
- H5 Restore land, wetlands and wetland-associated watersheds
- H7 Keep water on the landscape
- LU6 Reduce Upland and gully erosion through soil conservation practices

Which other plans are addressed in this program:

- Long Range Duck Recovery Plan
- Long Range Plan for the Ring-Necked Pheasant in MN
- Minnesota's Wildlife Action Plan 2015-2025
- North American Waterfowl Management Plan

Which LSOHC state-wide priorities are addressed in this program:

- Address conservation opportunities that will be lost if not immediately acted on
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Target unique Minnesota landscapes that have historical value to fish and wildlife
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

Which LSOHC section priorities are addressed in this program:

Forest / Prairie Transition:

- Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife
- Protect, enhance, and restore rare native remnant prairie
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

Metro / Urban:

- Protect habitat corridors, with emphasis on the Minnesota, Mississippi, and St. Croix rivers (bluff to floodplain)
- Protect, enhance, and restore riparian and littoral habitats on lakes to benefit game and nongame fish species

Prairie:

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes
- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna
- Convert agricultural land to wetland/upland to protect, enhance, or restore existing habitat complexes, such as WMAs
- Protect, restore, and enhance shallow lakes
- Protect expiring CRP lands
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

Relationship to other funds:

- Environmental and Natural Resource Trust Fund
- Clean Water Fund

Describe the relationship of the funds:

Beginning in 2009, the BWSR has received FY10-11 and FY12-13 funding of \$18.5 million through the Clean Water Fund (from the Clean Water, Land and Legacy Amendment) to establish and restore permanent RIM Reserve Riparian buffers and Wellhead Protection Easements to keep water on the land in order to decrease sediment, pollutant and nutrient transport, reduce hydrological impacts to surface waters and increase infiltration for groundwater recharge. BWSR has also received Clean Water Fund funding in FY10-11 and FY12-13 totaling \$5 million for RIM Reserve easements in areas where the vulnerability of the drinking water supply management area is designated high or very high by the Minnesota Department of Health.

In addition, the Farm Bill Assistance Partnership with BWSR, DNR, PF and SWCDs pays for SWCDs to have technicians to promote the conservation provisions of the Federal Farm Bill and other conservation program opportunities to private landowners. The Environmental and Natural Resources Trust Fund (ENRTF) provided \$1.0M via an LCCMR recommendation in FY10-11, \$625,000 in FY12-13 and \$3.0M in FY 14-15.

How does this program accelerate or supplement your current efforts in this area:

The RIM Reserve program was established in state statute in 1986 to restore and set aside marginal land principally for increasing fish and wildlife populations. Past funding via bonding varies, ranging from \$0 in most "off-year" bonding bills to a one-time maximum of \$52 million for the Minnesota River CREP in 2001. BWSR received bond funds in 2008, and in 2010 for a special flood disaster in Southern

Minnesota.

The RIM-WRP Partnership received Outdoor Heritage Funds in 2009 (\$9.058 million), 2010 (\$6.895 million), 2011 (\$13.0 million), and 2012 (\$13.810 million). All of these OHF appropriations are being used to protect and restore previously drained wetlands and adjacent native grasslands through permanent conservation easements. The 2012 appropriation is also transitioning to the RIM Wetlands Partnership from the RIM-WRP Partnership. The RIM Reserve program is not funded by general revenue and is not part of BWSR's agency base budget. All aspects of the program are funded by project funds the agency requests and receives to accomplish program objectives.

Per MS 97A.056, Subd. 24, Any state agency or organization requesting a direct appropriation from the OHF must inform the LSOHC at the time of the request for funding is made, whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose:

Not Listed

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Once a RIM easement is acquired, BWSR is responsible for maintenance, inspection and monitoring into perpetuity. The BWSR partners with local SWCDs to carry-out oversight, monitoring and inspection of its conservation easements. Easements are inspected for the first five consecutive years beginning in the year after the easement is recorded. Thereafter, on-site inspections are performed every three years and compliance checks are performed in the other two years. SWCDs report to BWSR on each site inspection conducted and partners' staff document findings. A non-compliance procedure is implemented when potential violations or problems are identified.

Activity Details:

Will there be planting of corn or any crop on OHF land purchased or restored in this program - **Yes**

Explain

In certain circumstances food plots for wildlife are an allowable use on RIM easements and must be part of an approved Conservation Plan. Food plots on narrow buffers, steep slopes and wet areas are not allowed. RIM policy limits food plots to 10% of the total easement area or 5 acres whichever is smaller. There is no cost share for establishment of food plots and upon termination the landowners must reestablish the vegetation as prescribed in the Conservation Plan at their own expense. Food plots are a rarely selected option by landowners, to date only 2.2% of RIM Buffers have food plots.

Are any of the crop types planted GMO treated - **No**

Will the eased land be open for public use - **No**

Is the land you plan to acquire (easement) free of any other permanent protection - **Yes**

Is the activity on permanently protected land per 97A.056, subd 13(f) and/or public waters per MS 103G.005, Subd. 15 - **Yes (Private Land)**

Accomplishment Timeline:

Activity	Approximate Date Completed
Conduct sign-up, ranking and selection of easements	Spring/Summer 2013
Acquire easements	2013-2016
Wetland/native grasslands restored	2014-2016

Date of Final Report Submission: 6/30/2021

Federal Funding:

Do you anticipate federal funds as a match for this program - **No**

Outcomes:

Programs in forest-prairie transition region:

- Increased availability and improved condition of riparian forests and other habitat corridors
- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need
- Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands
- Water is kept on the land

Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and other species.

Programs in prairie region:

- Expiring CRP lands are permanently protected
- Increased participation of private landowners in habitat projects
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Protected, restored, and enhanced shallow lakes and wetlands
- Remnant native prairies and wetlands are permanently protected and are part of large complexes of restored prairie, grasslands, and large and small wetlands
- Water is kept on the land

Budget Spreadsheet

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan
