Subd. 6. Audit. The legislative auditor shall audit the outdoor heritage fund expenditures, including administrative and staffing expenditures, to ensure that the money is spent in compliance with all applicable law and the Constitution.

Subd. 7. Legislative oversight. The senate and house of representatives chairs of the committees with jurisdiction over the environment and natural resources budget shall convene a joint hearing to review the activities and evaluate the effectiveness of the council and to receive reports on the council from the legislative auditor no later than June 30, 2014.

Subd. 8. Revenues. When a parcel of land that was previously purchased with outdoor heritage funds is transferred to the state, the owner of the land shall disclose to the council and commissioner of natural resources:

(1) all revenues generated from activities on the land from the time the land was purchased with outdoor heritage funds until the land was transferred to the state;

(2) all holding costs associated with managing the land between the time of purchase with outdoor heritage funds and the time the land was transferred to the state; and

(3) the total net revenues as determined by subtracting the costs described in clause (2) from the revenues described in clause (1).

Subd. 9. Lands in public domain. Money appropriated from the outdoor heritage fund shall not be used to purchase any land in fee title or a permanent conservation easement if the land in question is fully or partially owned by the state of Minnesota or a political subdivision of the state, unless: (1) the purchase creates additional direct benefit to protect, restore, or enhance the state's wetlands, prairies, forests, or habitat for fish, game, and wildlife; and (2) the purchase is approved by an affirmative vote of at least nine members of the council.

Subd. 10. Restoration evaluations. The commissioner of natural resources and the Board of Water and Soil Resources may convene a technical evaluation panel comprised of five members, including one technical representative from the Board of Water and Soil Resources, one technical representative from the Department of Natural Resources, one technical expert from the University of Minnesota or the Minnesota State Colleges and Universities, and two representatives with expertise in the project being evaluated. The board and the commissioner may add a technical representative from a unit of federal or local government. The members of the technical evaluation panel may not be associated with the restoration, may vary depending upon the projects being reviewed, and shall avoid any potential conflicts of interest. Each year, the board and the commissioner may assign a coordinator to identify a sample of up to ten habitat restoration projects completed with outdoor heritage funding. The coordinator shall secure the restoration plans for the projects specified and direct the technical evaluation panel to evaluate the restorations relative to the law, current science, and the stated goals and standards in the restoration plan and, when applicable, to the Board of Water and Soil Resources' native vegetation establishment and enhancement guidelines. The coordinator shall summarize the findings of the panel and provide a report to the chair of the Lessard-Sams Outdoor Heritage Council and the chairs of the respective house of representatives and senate policy and finance committees with jurisdiction over natural resources and spending from the outdoor heritage fund. The report shall determine if the restorations are meeting planned goals, any problems with the implementation of restorations, and, if necessary, recommendations on improving restorations. The report shall be focused on improving future restorations. Up to one-tenth of one percent of forecasted receipts from the outdoor heritage fund may be used for restoration evaluations under this section.
